

# *Porn crackdown approved*

JULY 3/86

EDMONTON (Staff) — Alberta Women's Institutes sent a message of congratulation to federal minister of justice John Crosbie for taking a stand against pornography.

The organization has long been lobbying for some action by government. While they don't necessarily agree with the government's definition of pornography, which does not distinguish between erotica and hard core pornography, second vice-president Holly Hallett said they are pleased legislation has been introduced.

The AWI recommendation congratulates the minister for introducing legislation controlling the production and distribution of pornographic material, especially for proposed legislation in regards to sexual assault and abuse of children.
