

The government should undertake a thorough and public review of existing legislation, institutional arrangements and policies & then more decisively to implement integrated management by filling gaps in the legal & regulatory regime, enhancing institutional capacity to manage cumulative effects & ensuring accountability for outcomes

The Alberta Government

Develop a decision making process that involves all impacted Governments - Alberta, Federal, First Nations, Metis, NWT, Saskatchewan

Develop a policy & planning framework for the oil sands region that sets land use priorities and environmental limits and thresholds for land and resource use.

Establish a regulatory regime that ensures that the policy & planning framework has a legal basis

Talk to Jim V. about my discussions with
NRCAN + the Agency

also - actions re: Mackenzie River Basin ^{bilateral} agreements

Regional Cumulative ^{Environmental} Management

Environmental performance requirements for new projects
+ replacement projects should be based on
~~the use of~~ BATEA

Spatial specific

Expand the cap and trade system
~~to~~ the oil sands industry -
apply to

give

confidence

flaring - back stop

There is still an elephant in the room -
that is a moratorium.
